Training Facilities and Equipment Transfer of virus via equipment used in session. Transfer of virus within the location	Employees at venue Coaches Players Public	3	4	12	<ul style="list-style-type: none"> • Training sessions will be undertaken in accordance with any specific venue guidance in terms of walkways, facilities, equipment etc. • All attendees at training must be members of the club and agree to adhere to club guidelines. • Players to arrive and leave in kit and minimise need to use changing facilities. • Cleaning and wiping down all equipment with sanitiser before and after sessions. • Sanitise hands after setting up and taking down equipment. • Having a limited number of balls to reduce overall risk of transfer. Equivalent to 1 per person. Individual bubbles within training sessions will use the same balls throughout the session • Only use essential equipment • Players to use own sweat towels to remove any sweat from the floor and sanitise hands immediately afterwards 	2	3	6

Training Conduct Transfer of virus as a result of increased interaction between players, coaches and staff, and even public	Players, Coaches and Wider Staff	3	4	12	<ul style="list-style-type: none"> • Training sessions will be undertaken in accordance with any specific venue guidance in terms of walkways, facilities, equipment etc. • All attendees at training must be members of the club and agree to adhere to club guidelines. • Limit number of people in training sessions. Maximum 30 in a training session per field of play (including coaches). No other persons allowed in the venue. • Adult only sessions will be limited to a maximum of 6 per individual bubble. Clear guidance on the use of bubbles is contained within the Volleyball England document which is published on the club website • Players and coaches will adhere to the use of individual bubbles at all times for adult or mixed adult/junior sessions • Players and coaches to maintain two metre social distancing at all times during sessions other than specified technical training phases (see below). • Players and coaches to avoid all unnecessary contact such as handshakes or hand slaps. • Players and coaches to hand sanitize during breaks (minimum every 30 minutes) • Where a bubble is in place the same group must stay together throughout the session, including 	2	3	6

					drinks and ball cleaning breaks. <ul style="list-style-type: none"> • Balls will be cleaned every 30 minutes. • Players to bring their own water bottle, sweat towel, sanitiser and enough kit to reduce sweating to each session. • Players and coaches should keep their belongings at least two metres apart. • Travel to sessions under government guidelines with social distancing. • Avoid unnecessary activities associated with sporting development during training session (e.g. no group briefings, meetings, season planning, which could be conducted online at a later date) • Conduct drills that will remain purposeful but can be performed at an appropriate social distance.

SPECIFIC TRAINING ACTIVITIES <u>Defining Specific Incidents in Indoor Volleyball</u> It is a fair statement to say that Indoor Volleyball is NOT a contact sport, and that the close-contact exposure risk is low. The main incidences where contact may occur and result in intrusion into the two metre social	Players, Coaches and Wider Staff	3	4	12	<ul style="list-style-type: none"> • ALL OF THE ABOVE CONTROLS • Avoid all drills in sessions where physical, hand to hand contact may occur • Ensure Drills do not contain any deliberate contact between players • Structure drills that remove risk of unpredictability in some cases that may result in accidental contact e.g. minimise bodies on court, deliberately feeding balls between players. • Maintain two metre social distancing at all times and in all other drills when not involved in the 	2	3	6

<p>distance radius:</p> <ol style="list-style-type: none"> 1. Blockers and hitter being in close vicinity to of one another albeit on opposite sides of a net, occasionally brushing hands (e.g. jousting) 2. Colliding or making contact with one's partner on the same side of the net e.g. chasing a ball in defence, going for the same ball in serve receive. 3. During some drills, players may find themselves within two metres of another athlete's e.g. passing and setting drills, where one person acts as a target and can find another athlete close to them due to an errant pass. 4. Players making contact in breaks of play to slap hands with partner or opponents. <p>The risks associated with points 3 and 4 can be easily controlled by avoiding these drills (on point 3, targets can simply adjust to make sure they don't come into contact should this occur). The likelihood of incident occurring is very low even at the elite level, sometimes not occurring at all across the course of a training session, and would fall into what government advice deems as appropriate to break the two metre social distance boundary.</p> <p>However, incident one is likely to occur frequently in a game situation with a blocker and a hitter. Whilst this may be frequent, this does not involve any direct contact and does not occur for</p>				<p>incidences outlined above.</p> <ul style="list-style-type: none"> • Drills should be carried out at sufficient speed and intensity to avoid players having face to face contact within 2 metres of each other for longer than 2 seconds. 			
---	--	--	--	--	--	--	--

<p>extended durations of anymore than one to two seconds. If athletes follow the above personal hygiene guidelines during water breaks and before and after sessions, the this should be able to be performed safely and fall into what government advice deems as appropriate to break the two metre social distance boundary.</p> <p>Taking into account the above this makes Volleyball a low risk sport in general in terms of resuming group training.</p>
